

Philip Toulinov

Release & DevOps Engineer

San Francisco Bay Area · toulinov.philip@yahoo.com · +1 (415) 823-7537 · linkedin.com/in/ptoulinov · Bilingual EN / FR

Summary

Release & DevOps engineer who builds and automates the pipelines that take software from a commit to production — fast, tested, and reliable. CI/CD, test automation and cloud-native deployments; equally comfortable in a Jenkinsfile and on a 5G RF test bench.

Skills

CI/CD & DevOps: Jenkins, GitHub Actions, GitLab CI/CD, Release Engineering, GitOps, Kubernetes, AWS, Cloud-Native

Languages: Python, Java, JavaScript, C++ **Testing:** Selenium, Mabl, Pytest, JUnit

Build & infra: Docker, Terraform, Gradle, Maven, Git, GitHub, GitLab, SQL

Experience

Release Engineer — LendingClub

Dec 2021 – Jan 2024 · Hybrid

- Designed and ran CI/CD pipelines that cut deployment time ~30% and tightened the whole dev loop.
- Added Mabl end-to-end tests as a release gate, catching regressions before deploy rather than in production.
- Automated the release process together with the teams that owned the services, for reliable, repeatable deploys.
- Maintained and upgraded the internal GitHub platform the engineering teams depended on.
- Built monitoring & incident-response automation that shortened time-to-resolution.

Software & Device Engineer — Tech Mahindra

Sep 2021 – Dec 2021 · On-site

- Led LTE / 5G NR protocol and RF RRM conformance testing on the Keysight E7515B and Anritsu MD8430A.
- Scripted automated test rigs (Rohde & Schwarz CMW500, Keysight Nemo), cutting manual setup time ~25%.
- Debugged firmware on Qualcomm Snapdragon hardware with RTOS tooling and hardware debuggers (Lauterbach Trace32).
- Ran monthly Git branching & JIRA workflow training for global teams.

Software Engineer Intern — Catalina USA

Jun 2020 – Sep 2020 · Remote

- Built integration, acceptance and regression tests in Selenium WebDriver.
- Set up and troubleshoot Continuous Delivery builds in Jenkins, wired into JIRA.
- Containerized build environments with Docker so jobs ran on a clean, pinned toolchain.

Education

B.S. Computer Science — Humboldt State University (2021)

Lycée Français La Pérouse — schooled in French; bilingual English / Français

Independent builds: real-time data infrastructure, an algorithmic trading bot, a Telegram crypto-lending platform, an AI-infrastructure monitor, and a creative PWA. See philipptoulinov.com/projects.html.
